We are pleased to invite you to the 22nd International Workshop on Neonatology and Pediatrics to be held in Cagliari, Italy.

This follows the success of the previous 21 editions, 19 in presence and 2 online, which saw the overall presence of about 13,000 participants in presence and 700 online. This 22nd Workshop is an important milestone and is recognized by several international and scientific societies. Some of the world's most renowned specialists from more than 60 different countries have been present in Cagliari in these years. The Workshops have received the High Patronage of the President of the Italian Republic (6 years) and UNICEF (4 years). Due to the organization of this meeting, Prof. Fanos has been awarded in 2021 as "Italian Knowledge Leader" by the National Institute of Tourism, Convention Bureau Italy under the Patronage of Ministry of Tourism. Moreover he has been awarded in Thessaloniki in 2026 for the Leadership and Impact in the Mediterranean Area by International Congress and Convention Association (ICCA). The Workshops have created a network of scientific and human relations that have changed, improved and enriched us all see the History of our Workshop:

<https://jpnim.com/index.php/jpnim/article/view/e100224/815>

In 2019 the meeting was followed by the 40th Congress of the Union of Middle Eastern and Mediterranean Pediatric Societies (UMEMPS), founded more than 60 years ago. In 2020 and 2021 the meeting was virtual due to the pandemic. The title of this year workshop, "Precision Neonatology and Pediatrics" underscores the trajectory that necessarily assistance, research and teaching are present today and will follow in the coming years. A view into the present for perinatology and pediatrics through debates and shared experiences from all the world.

This year the proceedings of the Workshop will be published in the "Journal of Pediatric and Neonatal Individualized Medicine" (JPNIM), which is indexed in Scopus and Web of Science, official Journal UMEMPS (Union Middle Eastern and Mediterranean Pediatric Societies) and other 9 important national societies of Italy, Greece, Portugal and Romania. At the end of 2023 JPNIM was awarded a "Journal of High Cultural Value" prize by the Italian Ministry of Culture: the reasons of success are presented in a specific paper of the Journal (J Pediatr Neonat Individual Med. 2024;13(1):e130104. doi: 10.7363/130104). In past years the journals were "Medical and Surgical Pediatrics", "Journal of Chemotherapy", "Journal of Maternal Fetal Neonatal Medicine", "Clinica Chimica Acta" and JPNIM.

Over the years, the Workshop has made its impression on science and has promoted a lively discussion in an always serene and extremely constructive atmosphere. More than 1000 speakers (330 Top International Scientists coming from more than 60 countries). Abstracts were sent by more than 50 countries). In 2024 it was published the volume "A small history of the future. 20 International Workshops on Neonatology and Pediatrics in Cagliari"

This year's meeting is organized in presence and will have the participation of several Presidents of International and National Societies. The main topics that will be discussed cover cutting-edge topics such as neonatology, nutrition, epigenetics, ethics, obesity (first marathon), metabolomics (second marathon), environment (third marathon), rare diseases, nutraceuticals and many other topics. The meeting is dedicated to neonatologists, pediatricians, obstetricians, perinatologists, psychologists, pathologists, laboratory researchers and all those who work with the newborns and children (hospital pediatricians, family pediatricians, nutritionists, pharmacists, obstetricians, midwives, nurses...).

We look forward to welcoming you to this traditional appointment to discuss topics of the present and keep us up to date on the latest results, both in clinical practice and research in neonatology and pediatrics.

Razionale Scientifico

Il congresso di Pediatria affronta numerosi argomenti “cutting-edge” della Pediatria Contemporanea con diverse letture tenute da prestigiosi speaker pediatri universitari, ospedalieri e di famiglia. Dalla Neonatologia alla Pediatria molti argomenti con aggiornamenti significativi sono trattati con alcuni speciali focus sulla Pediatria Generale e Specialistica e sul concetto di **ONE HEALTH**, per un ambiente a misura di bambino.

Il Workshop 2026 desidera suscitare l'interesse sia degli “addetti ai lavori”, e inoltre, vuole rappresentare l'occasione per migliorare le conoscenze e condividere con specialisti di diversa estrazione le novità della ricerca sia nel campo della diagnostica che della terapia.

ABSTRACTS

All the abstract of the lectures will be published in the
Journal of Pediatric and Neonatal Individualized Medicine (JPNIM)
 awarded a “Journal of high cultural value” prize by the Italian Ministry of Culture
<https://jpnim.com/index.php/jpnim/article/view/080223/648>

The abstracts must be sent within 5 September 2026 to the following addresses:
vafanos@jpnim.com - luisaserra@kassiopeanews.com

JPNIM is a peer-reviewed interdisciplinary journal which provides a forum on new perspectives in pediatric and neonatal medicine. The aim is to discuss and to bring readers up to date on the latest in research and clinical pediatrics and neonatology. Special emphasis is on developmental origin of health and disease or perinatal programming and on the so-called ‘-omic’ sciences. Systems medicine blazes a revolutionary trail from reductionist to holistic medicine, from descriptive medicine to predictive medicine, from an epidemiological perspective to a personalized approach. The journal will be relevance to clinicians and researchers concerned with personalized care for the newborn and child. Also medical humanities will be considered in a tailored way.

The Journal of Pediatric and Neonatal Individualized Medicine (JPNIM) is the **Official Journal UMEMPS** (Union of Middle-Eastern and Mediterranean Pediatric Societies), the Portuguese Neonatal Society (Sociedade Portuguesa de Neonatologia, affiliated to the Portuguese Paediatric Society), the Hellenic Neonatal Society, the Hellenic Society of Perinatal Medicine, the Italian-Romanian Pediatric Society (IRPS), SIN INF (Italian Neonatal Nursing Society, Società Italiana di Neonatologia Infermieristica), S.I.P.Ped. (Italian Society of Pediatric Psychology, Società Italiana di Psicologia Pediatrica), SIPO (Italian Society of Hospital Pediatrics, Società Italiana Pediatria Ospedaliera), SIMPE (Italian Society of Pediatric Physicians, Società Italiana Medici Pediatri) and AMBO (Alleanza per un ambiente a misura di bambino).
